

INTRODUCTION TO  
**DenticDS™**  
PATIENT COMFORT

## Dental Anxiety

---

Anxiety is the #1 mental illness in the world. It increased dramatically post-Covid.

Dental anxiety is #5 in prevalence of anxiety disorders. It is the leading cause of noncompliance, and this leads to dental disease and may lead to several forms of systemic disease.

Up to 20% of all dental patients experience dental anxiety while 5% of patients suffer from dental phobias.

### **WELL HEALTH ALERT**

**The United States Preventative Services Task Force** recommends everyone under 65 be screened for anxiety.

## PDS breaks the Cycle of Fear with Patient Comfort.

We recognized the prevalence of the Cycle of Fear, and this led us to develop Patient Comfort, a phytocannabinoid-based product augmented by advanced delivery chemistry and sold exclusively to dental professionals.

Patient Comfort is a 2-dose pre-dental treatment designed to help alleviate dental anxiety. Patients take it the night before their dental procedure to help them sleep and the day of their dental procedure to help them relax.

### PATIENT COMFORT:

- Is made from organically sourced, whole plant extract including CBD
- Does not contain detectable traces of THC
- Does not contain solvents or other harmful chemicals
- Contains 75mg total of micellar broad spectrum phytocannabinoids

Our products are manufactured in cGMP certified, FDA inspected facilities and come with a Certificate of Analysis so you can see everything that's in our products ([See Appendix 1](#)).

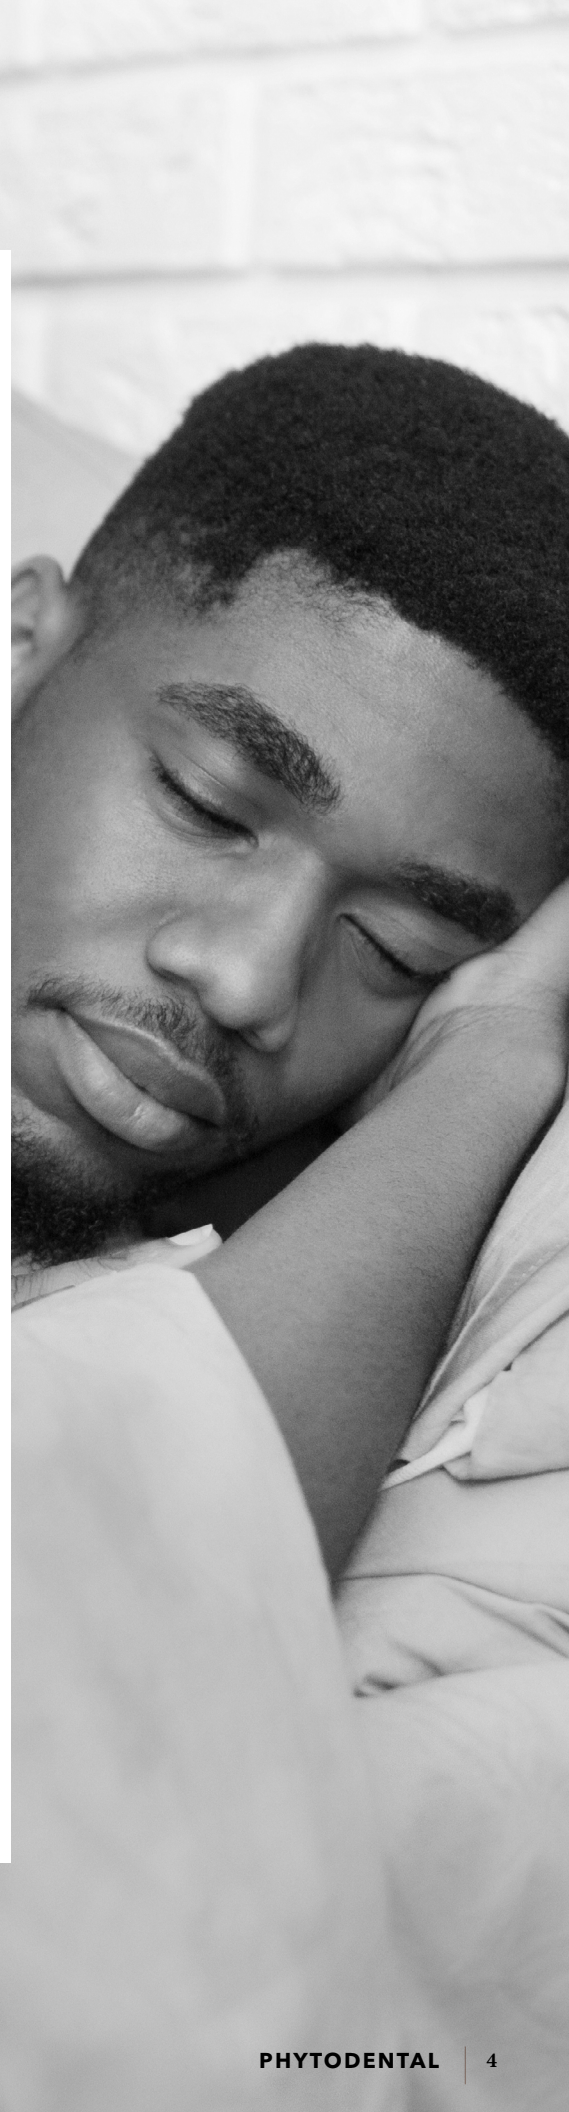

# Don't take our word for it. Look at the results from our clinical study.

---

## **In a published, peer-reviewed clinical study, findings of patients who took Patient Comfort included:**

- A reduction in psychic and somatic symptoms between 43%-67%.
- 87% reported improved sleep the night prior to their dental procedure.
- Data sets yielded significant 1-tail statistical differences (p-values < 0.05).

Patients who participated in the study are asking for Patient Comfort prior to their next upcoming appointment!

## Consumer Product Information

### PATIENT COMFORT: NIGHTTIME SLEEP

Nighttime Sleep is formulated with inclusion of the #1 recommended sleep supplement melatonin. Phytocannabinoids increase the efficacy of melatonin to assist in a patient going to sleep as well as increasing the time spent in the most restful level of deep sleep. A good night's sleep reduces a patient's apprehension about the next day's visit to the dental office.

| SUPPLEMENT FACTS                            |          |          |       |
|---|----------|----------|-------|
| Serving Size: 2 fl. oz. (60 ml)             |          |          |       |
